

CONDUIT/ VENTURES

At Conduit Ventures, we enable our clients to **dream** big, **build** fast, and accelerate **growth**.

Overview & Vision

- A full-service, value-added advisory and venture partner, bringing industry-leading expertise in software development, product, design, and more
- We empower technology leaders to innovate with speed and agility
- The C/V team has experience shaping the software development culture of startups and tech companies from coast to coast
- We strive to future-proof the products we ship so all future iterations can be done with speed and scale
- At Conduit, we bring a startup mentality with a focus on customers
- We have a big vision to find creative ways to invest in the entrepreneurial and tech ecosystem, helping founders and technology leaders build great software and take products and ideas to market
- C/V is creating a widespread movement to modernize technology, putting an emphasis on service above all else

Key Differentiators

- Strength & expertise of the C/V team: We've worked at and led teams at global technology and product companies and we've hired highly qualified, experts.
- Customized solutions: We work closely and collaboratively with our clients to develop a customized solution that aligns to the business need.
- Repeat Clients & Long-term engagements: Each project has led to follow-on work and increased scope of the engagement.
- Global network C/V has a strong local presence but brings a distributed and highly collaborative team to expand our network; global focus with all the benefits of local touchpoints.
